

Zero-touch Connectivity for Community Living

Features:

- Property-wide Internet coverage
- Single unified network throughout the property with micro-segmentation for residents and communal spaces
- Headless-device onboarding
- Native support for thousands of connections
- Gaming ready -- optimized for devices, consoles, and controllers
- IoT and Smart-home ready
- Multiple ISP connections to ensure connectivity and reduce downtime
- Purpose-built and future-ready infrastructure make future upgrades seamless
- Custom self-service portal for residents, custom admin portal for management

Benefits

- Include new amenities and create new revenue opportunities
- Deploy and maintain more efficient networks
- Enable new communal space offerings with high-speed Internet access for streaming, vendors, and payment processing
- Built for adding future amenities while not adding additional infrastructure
- Prepare for future technology changes and upgrades
- Attract new residents with near-instantaneous access to premium Internet services
