## WHO WE ARE

---

In the era of remote work, streaming, and IoT, seamless and reliable internet access is a foundational element of modern residential life and a unique opportunity for differentiation for savvy property owners. With more than 80% of the US's internet access achieved over WiFi, consumer-grade, unmanaged networks, and best-effort residential internet connections just don't cut it in multi-family environments anymore.

Modern buildings require modern infrastructure solutions capable of dynamically supporting an ever-expanding list of complex multi-technology use cases. Dual Path's network solutions act as a scalable, property-wide foundation empowering tenants, staff, and building-wide technology now and into the future.

Dual Path is an industry leader in the design, deployment, and operation of robust, software-defined wired and wireless networks supporting voice, video and data in Multi-Family, Senior Living and Commercial Real Estate.

We leverage proprietary micro-segmentation technologies together with comprehensive, scalable, and secure campus-wide network infrastructures, to dynamically provision personalized high-speed Internet access at scale. We proactively monitor, manage, and support our networks and their users 24 hours a day, 7 days a week leveraging our Compassionate Support™ certified technicians, specially trained to enable and empower users regardless of technical acumen.

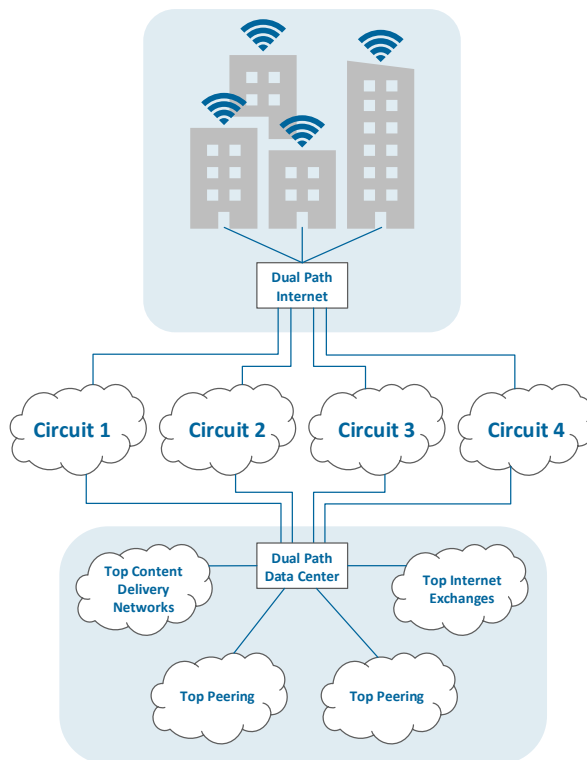

## WHO WE ARE

---

We love what we do. We take pride in our work, and our customers take notice with benefits including:

- **Move-In-Ready** - Property-wide, private connectivity for residents, staff, visitors and building IoT
- **Personal Micro-Network Segments** - Micro-segmented and software defined networks providing customized secure Internet access experiences at scale
- **Future Proof Foundations** - Robust, professionally managed IP infrastructure foundations supporting future use-cases (connected buildings, IoT, location-based services, Hotspot 2.0 carrier offload, etc.)
- **Superior ISP Agnostic Internet Connectivity (SD-WAN)** - Scalable, redundant, net- neutral internet connections layer 2 routed to the largest local data centers and peered directly with the country's largest content providers (CDNs) and public Internet exchanges (IXs)
- **Proactive Compassionate Support** - In-house proactive Compassionate Support™ Certified technicians available 24x7 and ready to help
- **National Footprint** – Truly better network connectivity available for residents nationwide
- **Collaborative Revenue Models & Operating Structures** – Dual Path's solutions are readily adaptable to a myriad of revenue models and operating structures based on project-specific requirements
